

GRADIENT 1.4

When we designed and built our first Gradient 1.0 loudspeaker, we had no idea how strong and everlasting symbol for our company it would eventually become. A product that has stood against time all these years.

It is an honour to continue the iconic 1. -line by launching the new Gradient as a part of a programme on the centenary of Finland's independence.

TECHNICAL SPECIFICATIONS

Frequency response	27...25000Hz
Impedance	4 ohm
Sensitivity	86dB/2,83V/1m
Recommended amplifier power	50...150W
Drivers	1 x 176mm pre-coated reed-paper cone midrange, 1 x 25mm coaxial Al/Mg dome, 1x220mm long throw woofer
Crossover frequency	200 and 2800Hz
Connections	Binding posts
Finish	White or graphite black
Dimensions (WHT)	320 x 880 x 320mm

Made in Finland by Gradient Labs Ltd.
